# Web of Science – citačná databáza

# Kritéria pre časopisy

## Publikačné standardy

- Recenzované
- Etické publikačné praktiky
- Spĺňa technické požiadavky (XML / PDF)
- Metadata v angličtine
- Vydávanie pravidelne a včas
- Medzinárodné editorské zvyklosti

## Obsah

- Žiadalo nás odborné publikum o tento obsah?
- Obohatí tento časopis WoS s novým obsahom?
- Je a ako je táto téma zastúpená vo WOS?
- Porovnávanie časopisu s časopismi vo WOS, ktoré sú v tom obore

## Rôznorodosť

- Reprezentujú autori, editori a vedecká redakčná rada medzinárodnú výskumnú komunitu?
- Je medzinárodné zastúpenie autorov a redakčnej rady na vhodnej úrovni pre takýto časopis?

## Analýza citácií

- Celkový počet citácií
- Citačná aktivita v poslednej dobe
- Citovanosť autorov a členov redakčnej rady

Červená = minimálne kritéria pre ESCI

# WOS Core Collection - nastavenie

The screenshot shows the Web of Science Core Collection search interface. At the top, there is a navigation bar with links for Web of Science™, InCites™, Journal Citation Reports®, Essential Science Indicators™, EndNote®, Sign In, Help, and English. The main header features the 'WEB OF SCIENCE™' logo and a search bar containing the text 'Example: oil spill\* mediterranean'. Below the search bar, there are several settings sections:

- TIMESPAN**: Includes a radio button for 'All years' and a 'From' field set to '1900' and a 'to' field set to '2014'.
- MORE SETTINGS**: A dropdown menu that expands to show two categories of indexes:
  - Web of Science Core Collection: Citation Indexes**: A list of seven checked items: Science Citation Index Expanded (SCI-EXPANDED) --1900-present, Social Sciences Citation Index (SSCI) --1900-present, Arts & Humanities Citation Index (A&HCI) --1975-present, Conference Proceedings Citation Index- Science (CPCI-S) --1990-present, Conference Proceedings Citation Index- Social Science & Humanities (CPCI-SSH) --1990-present, Book Citation Index- Science (BKCI-S) --2005-present, and Book Citation Index- Social Sciences & Humanities (BKCI-SSH) --2005-present.
  - Web of Science Core Collection: Chemical Indexes**: A list of two checked items: Current Chemical Reactions (CCR-EXPANDED) --1985-present (including Institut National de la Propriete Industrielle structure data back to 1840) and Index Chemicus (IC) --1993-present.
- Data last updated: 2014-11-28**
- Auto-suggest publication names**: A dropdown menu set to 'On'.
- Default Number of Search Fields to Display**: A dropdown menu set to '1 field (Topic)'.

At the bottom, there are links for 'Customer Feedback & Support' and 'Additional Resources'. A note at the bottom right states: '(To save these permanently, sign in or register.)'

Yellow arrows in the image point to the 'WEB OF SCIENCE™' logo, the search bar, the 'Basic Search' dropdown, the 'TIMESPAN' settings, the 'MORE SETTINGS' dropdown, and the 'Auto-suggest publication names' dropdown.

## Trends, rhythms, and aberrations in global climate 65 Ma to present

By: Zachos, J (Zachos, J); Pagani, M (Pagani, M); Sloan, L (Sloan, L); Thomas, E (Thomas, E); Billups, K (Billups, K)

### Abstract

Since 65 million years ago (Ma), Earth's climate has undergone a significant and complex evolution, the finer details of which are now coming to light through investigations of deep-sea sediment cores. This evolution includes gradual trends of warming and cooling driven by tectonic processes on time scales of 10(5) to 10(7) years, rhythmic or periodic cycles driven by orbital processes with 10(4)- to 10(6)-year cyclicity, and rare rapid aberrant shifts and extreme climate transients with durations of 10(3) to 10(5) years. Here, recent progress in defining the evolution of global climate over the Cenozoic Era is reviewed. We focus primarily on the periodic and anomalous components of variability over the early portion of this era, as constrained by the latest generation of deep-sea isotope records. We also consider how this improved perspective has led to the recognition of previously unforeseen mechanisms for altering climate.

### Abstract

Since 65 million years ago (Ma), Earth's climate has undergone a significant and complex evolution, the finer details of which are now coming to light through investigations of deep-sea sediment cores. This evolution includes gradual trends of **warming** and cooling driven by tectonic processes on time scales of 10(5) to 10(7) years, rhythmic or periodic cycles driven by orbital processes with 10(4)- to 10(6)-year cyclicity, and rare rapid aberrant shifts and extreme climate transients with durations of 10(3) to 10(5) years. Here, recent progress in defining the evolution of **global** climate over the Cenozoic Era is reviewed. We focus primarily on the periodic and anomalous components of variability over the early portion of this era, as constrained by the latest generation of deep-sea isotope records. We also consider how this improved perspective has led to the recognition of previously unforeseen mechanisms for altering climate.

### Keywords

The screenshot displays the Web of Science search results page. At the top, navigation links include 'Web of Science™', 'InCites™', 'Journal Citation Reports®', and 'Essential Science Indicators'. The search bar shows 'Search' and 'Results: 23,995 (from Web of Science Core Collection)'. A search filter indicates 'You searched for: TOPIC: (global warming) ...More'. On the left, there is a 'Refine Results' section with a search input and 'Web of Science Categories'. The main results list shows two entries. The first entry, 'Nanostructured materials', has a dropdown menu open with options: 'Save to EndNote online', 'Save to EndNote desktop', 'Save to ResearcherID - I wrote', 'Save to Other File Formats', and 'Save to RefWorks'. A 'Full Text from Publisher' button is also visible. The second entry, 'Changes in Atmospheric Constituents and in Radiative Forcing', includes author and editor information, a page range (129-234), and a publication year (2007). On the right side, there are 'Analyze Results' and 'Add to Marked List' buttons. Metrics for the first paper show 'Times Cited: 2,791' and 'Highly Cited Paper' status. The second paper shows 'Times Cited: 2,623'. Three blue callout boxes highlight specific features: 'Vytačenie Email' points to the email icon in the first result's action menu; 'Uloženie v rôznych referenčných manažeroch a formátoch' points to the 'Save to EndNote online' dropdown menu; and 'Marked list – vlastný zoznam publikácií' points to the 'Add to Marked List' button.
